Visual Arts in Peppermint

In Term 2, we have delved into the world of 3D art and art using paper. Students have used a variety of materials for make 3D art and explored how these are held together with different adhesives like glue sticks, tape or craft glue. The students made sculptures with paper/cardboard and also enjoyed several opporutunies to handbuild with clay and make impressions of flowers, leaves and shells into the clay.

Our hallways are looking bright and colourful with our collaborative artworks. Students learnt about types of paper and used a textured wallpaper as a base for rolling and printing a fantastic series of wall hangings.

I really value giving the students choice in their artwork and encourage them to create their art thoughtfully in the peaceful, unrushed environment of the art room. Well done to all the students of Peppermint for the effort you have put in this term.
