

ULURU

WHERE IN AUSTRALIA IS ULURU?

INTRODUCTION / BACKGROUND INFORMATION

Adventure to Uluru 29.8.23

G'day mate! Would you like to come to Uluru? If you would come a long, pack your bags we are going to... ULURU

An Australian holiday in the Northern Territory visiting Uluru. Uluru is a very large sandrock. It's amazing red colour. It stands at a whopping 348 meters high. It has interesting flora & fauna with over 400 species of plants and 21 mammals including the dingo. It's a hot arid desert. The First Nations tribe that Uluru belongs to is the Anangu people. They have owned it for a long time.

ANIMALS SURROUNDING ULURU 31.8.23

Animals

Now let's explore the animals of Uluru! Uluru is a wonderful place that has lots of animals such as the dingo, bilby, brown falcon & the red kangaroo. One of these animals is a dingo. It lives around Uluru and balances the ecosystem. The colour of this animal is a reddish sand colour but can also be black, light brown, or even white. It can stand more than 60cm high! A lean body and weighs between 13-23 kg. The dingo preys on rabbits, rats, mice, kangaroos, wallabies, birds and reptiles. The dingo communicates by growling, howling, barking & moans with at least 10 types! So if you ever emerge yourself in the wonder of Uluru, beware of the dingo!
