

It is nearly Spring!!

Last week we have been focusing on flora & fauna. Children were provided endless opportunities to explore their knowledge and understanding about their natural environment around them through a wide range of hands-on experiences such as leaf press, cotton bud & fork painting, Australian animal play space and much more.

This week we have been focusing on learning about human body where children were provided tools and techniques to learn how each part of the human body works through a wide range of hands-on-experiences such as DIY Lung model, brain model, pumping heart, digestive system, DNA model

IT'S ALL ABOUT SCIENCE

Over the last couple of weeks children have been focusing on science with great enthusiasm and actively participating in wide range of hands-on experiences. As an extension of our learning, this week we have been focusing on human body which enabled children to learn a few scientific & anatomical words and concepts such as atria, ventricles, blood vessels, veins, arteries, gas exchange, cerebrum, cerebellum, brain stem small and large intestine, esophagus, exhalation, inhalation and much more

Gosh do we have an exciting Spring Holiday Program planned for you!

Secret Garden

BOOKINGS OPEN 15th AUGUST!

As we do not run the holiday program at Marlborough Their Care service, however for the convenience of our families the bookings can be done at our neighbouring their care services such as:

Rangeview Their care
Eastwood Their Care

Alternatively you can visit our their care website and secure your child's spot in this magical journey of fun and discovery at
www.theircare.com.au

BREAKFAST CLUB

When: Every Friday starting at 7.30 a.m.

Where: Before School Care

Where: At Marlborough TheirCare Service!

Lock down drill

Last week we incorporated a lock down drill in our service. Incorporating emergency drills on a regular basis provides children with familiarity and confidence of what to expect during the real-life emergency situation. After the drill we collectively reflected on the scenario and provided opportunity for children to open ended communication to talk through and express their feelings which further provided children with a reassurance saying it was just a drill.

Technology and mindfulness in mat time

As an extension of our science learning, we have introduced a microphone and a lighted candle during our mat time. At mat time children are provided the opportunity to use the microphone to share their experiences of what they experienced in their school or home environment and to snuff the candle using the snuffer at the end of the mat time, which supports children to enhance their self-esteem, mindfulness and a sense of belonging.
