

# Script Wise

## Preventing prescription medication misuse.

Script  
Wise

Regional  
Forums  
2017

In Victoria, prescription medications have consistently contributed to more overdose deaths than either illicit drugs or alcohol.

Through this forum, we aim to educate and inform the community around the safe and appropriate use of prescription medications, focusing on medications most susceptible to misuse.

We encourage consumers, primary care providers, as well as pain, addiction and mental health specialists to attend.

### Details
