

## School Lunches at SACRED HEART, KEW

At Sacred Heart, Kew we have partnered with LunchFox: an award-winning Aussie made service that allows parents to order healthy school lunches from local cafes. Our school receives 5% from every order as fundraising.

We have linked with a fabulous local food business; Goodfood Grazing on Fridays. Lunches will be delivered straight to school.

**The LunchFox app is available to download now** from the app stores. Create an account and set up profiles for every child you plan to order for. Search for Sacred Heart, Kew in the school field and select your child's classroom from the dropdown menu.

You will also see an option to add allergy and dietary information to your child's profile. This will always be displayed against your child's order, making the information clear and concise for the chefs preparing your meal.

All orders will be individually bagged and delivered to school in time for lunch. Menus are completely customisable: you have the option of ordering an entire lunchbox of food, or simply selecting one or two smaller snack items. Everything on the menu is nut free.

If your child is unwell, or you need to change the date of an order, you can do this from the Home Screen up until 9am on the day of delivery. Simply tap on the order from the Home Screen and select a new date or follow the 'Move Order' button if displayed.

The settings page on your app has links to contact the LunchFox team directly if you run into any problems.

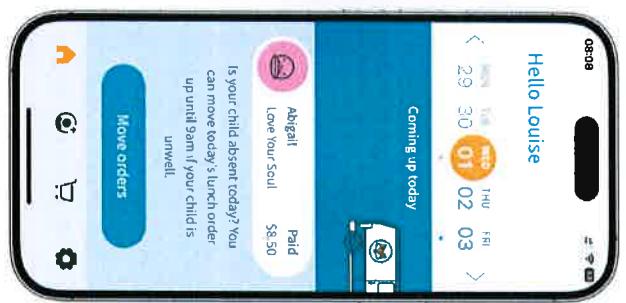

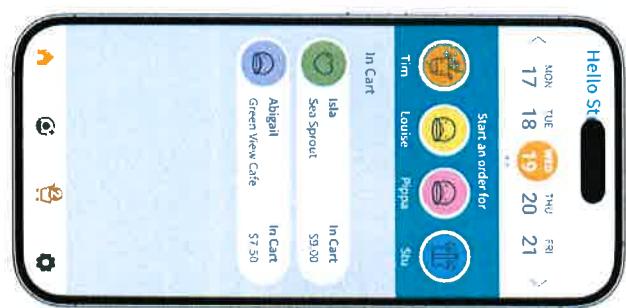

We hope you enjoy using the service.

The LunchFox app allows parents to order healthy school lunches from local cafes. Here's how to use it!

## ORDER SCHOOL LUNCH THROUGH LUNCHFOX

Create profiles for all children you plan to order for. Save key allergy information - this is ALWAYS shared with cafes

View and manage orders (for multiple children across multiple days) from the Home Screen

Keep on top of upcoming orders (either 'paid for' or 'in cart') from the Your Cart screen

Move your order to a new day from the home screen up until 9am on the day of delivery

Set yourself custom reminders, so you never miss the order cut off time, from the Settings Page
