

# UNCOVER UNCOVER

## FOCUS

Addition facts.

## AIM

To uncover the most numbers.

## GROUPS

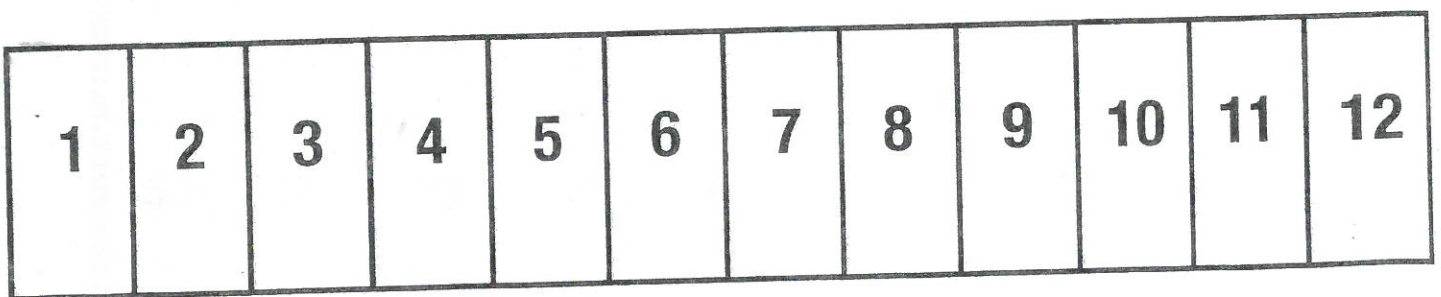

Pair of players or 2 players.

## EQUIPMENT

**Uncover** game board.  
2 six-sided dice  
24 transparent counters

## HOW TO PLAY THE GAME

- ▲ Using counters, pairs cover every numbered space along their number strips on the game board.
- ▲ The first pair rolls the two dice and adds numbers on them. The pair can uncover the sum or any combination of addends that equals the rolled sum.  
**Example:** If 2 and 4 are rolled, the pair can uncover 6 or any combination that makes 6 (1+5, 1+2+3, or 2+4).
- ▲ Pairs alternate turns, rolling dice and uncovering sums or addends on their number strips.
- ▲ When a pair can no longer use the covered numbers to make a sum or combination, play stops for that pair. When neither pair can uncover any more numbers, the game ends.
- ▲ The pair who uncovers the most numbers wins.

## MAKING CONNECTIONS

Promote reflection and make mathematical connections by asking:

- ★ Which sums did you prefer to roll? Why?
- ★ What strategies helped you uncover more markers?
