

## Scienceworks Excursion - Tu Nguyen

When we got in the classroom Ella showed us the scienceworks social story so we know what to do if we get lost and other important things. The bus was really noisy and chaotic! When we were out of the bus we were bursting with excitement! Our first stop at Scienceworks was the energy lab. There was a girl named Anna, she taught us the four forces, pull, push, gravity and air. The next stop was Think Ahead. In Think Ahead there were a lot of things to play with, from giant lpads to the spinning thing and also an emotions room, but unfortunately the giant lpad was out of order. The next stop was Sportworks. Sportworks had a Cathy Freeman race track, an area that can measure your heart rate and how tall you are. The next stop was... lunch! When we had lunch I was looking at everyones lunch boxes, and seeing their yummy lunches. After that we had a little play in the playground, but it was a little boring. After that we hopped back on the bus to go back to school, we had to wait for Ella because she was helping someone. Finally we got back to school and after recess we did a little bit of meditation and then we made recounts about Scienceworks.

The End.
