Our Philosophy

At AMIGA Montessori Burwood, we strive to provide each child with a sense of belonging. Our goal is to nurture their confidence, value their ideas and respect their views.

Children learn courtesy and respect for others and the world around them. As educators, we support children's natural curiosity for the world and support children to understand and respect others.

We collaborate and partner with families to support each child's individual learning goals and needs. Our classrooms provide children the opportunity to develop specific and essential life skills, as well as embed a deep understanding of various learning concepts.

Our Classrooms

Each classroom is specifically designed with Montessori resources to enhance each child's interest, intrigue and learning progression.

Our classrooms provide children with the resources and space to choose their own learning and explore at their own pace.

Children are free to choose their own learning, with support and guidance from our educators.

The Montessori Method of Teaching

Montessori is a method of teaching developed by Dr Maria Montessori in 1907, based on scientific observations of children's natural learning tendencies and willingness to learn as they unfold in prepared environments. The Montessori classrooms contain specifically designed and developmentally appropriate materials which invite children to engage in learning activities of their own individual choice.

Children develop concentration, motivation, self-discipline, respect and courtesy, independence, valuable and practical life skills and a love of learning.

About AMIGA Montessori

AMIGA Montessori is a family owned and operated business with 17 centres across Victoria and South Australia. Being a family owned business, we operate as a team across all centres and work together to create the best programs and learning environments for all children.
