

3P

In history, 3P has been learning about the Aspects of Indigenous Life.

They are learning how Indigenous people have traditionally used many different tools and weapons to build shelters, to hunt fish or animals, to protect themselves during conflicts and in ceremonies. All tools were made with things found in the surrounding environment. Materials were also obtained through trading with other tribes and groups.

3P were able to enhance their learning in classroom environment by seeing, touching and feeling the tools and weapons used by Indigenous people.
