

### About the business

Findlay Engineering is a local Ballarat business employing around 50 staff. Projects are varied across multiple industries such as food, brick, transport and water. Positions are available in our Machine Shop for both experienced applicants and also for people wanting to undertake an apprenticeship in the trade.

### About the role

- CNC Milling and Turning.
- Small to Medium Batch Machining.
- Working across a variety of machines, Feeler, Okuma & Mazak.
- Cam Programming experience an advantage but not essential.
- Ability to undertake fitting work both in shop and on site would also be an advantage.

### Skills and experience

- Trade qualifications or industry experience
- Strong work ethics and the ability to work unsupervised
- Attention to detail
- Committed to quality and excellence
- A good attitude and willingness to learn
