Second Hand and Digital Reactivation 2018

As you may be aware, a number of publishers apply a reactivation charge for students who wish to access the digital component when they have purchased a secondhand textbook.

This only applies to second hand books – most new textbooks have digital access for the first year included in the price of the book.

Cambridge University Press	<p>Digital reactivation is free for the life of the edition, EXCEPT all mathematics texts.</p> <p>Mathematics texts have a digital reactivation charge of \$19.95 for 12 months. This applies to, for example, their <i>Essential Mathematics</i> series, their <i>Cambridge Senior Mathematics</i> series, as well as their other mathematics texts.</p>
Nelson / Cengage Learning	<p>All Nelson textbooks include 4 individual access codes, allowing 4 years of digital access to Nelsonnet at no additional cost.</p>
Oxford University Press	<p>The digital component of all Oxford textbooks lasts for the life of the book. There are no reactivation charges.</p>
Pearson (including Heinemann)	<p>Digital reactivation for all Pearson textbooks is 50% of the price the same title as an ebook only, and provides access for 12 months.</p> <p>For example, the Heinemann Chemistry ebook costs \$51.95, so digital reactivation of a second hand textbook costs \$25.95.</p> <p>This needs to be paid directly to Pearson, and the student will be prompted to do so when the student attempts to use the digital code contained in their second hand book for the first time.</p>
Jacaranda	<p>All Jacaranda texts have a \$50 reactivation charge to provide the full access to LearnON.</p> <p>Students that do not pay the \$50 will have access to the LITE version of the ebook. The student will be prompted to pay for this when they login for the first time.</p> <p>The LITE version of an eBookPLUS provides access to the digital version of the text online, but does not provide access to any downloadable digital resources, videos, interactive content or interactive questions.</p>
