

Makers Empire: RAA Street Smart Showcase at Sfera's

By Shayla

On Friday, September 13th when the bell rang to start school, we went to the STEM area. We got into our presentation groups and practised our presentations. Soon it was time to walk to Sfera's and when we crossed the main road we had to look both ways for cars and only cross the road when it was clear and safe.

When we got to Sfera's we found our area and were given our 3D models in a box, so we set them up on our table. After all of the Modbury school tables were set up a song was played to tell us it was time to start the Showcase. Firstly, students from Walkerville Primary School shared a video of the Acknowledgement of Country that their school had made and it was good. The other schools also at the Showcase were Nailsworth Primary, Ardtornish Primary, Northfield Primary and

Walkerville Primary. Modbury School had four tables of students presenting. After a bit more talking by Mandi from Makers Empire, it was time to go back to our presentation tables.

We talked to other kids and adults about what street safety problem we had worked on, and the solution we came up with and explained how our 3D model would solve the problem. Students from Rooms 11 and 12 visited the Showcase and listened to us present and the other schools. It was great to have them visit with Mrs Curtis, Mrs Favell and

Mr Green.

Everyone was able to walk around the room and visit the other schools to see their ideas and models. We all were given 3 tickets and as we walked around the showcase and spoke to other students about their models we gave the tickets to the groups that we liked the best. We also had a passport and if we asked a group a question about their model then they gave us a stamp on our passport. If we got 3 rows stamped we got a sheet of stickers to take home. I got stickers to take home.

My group had photos taken and it was a fun way to share our learning with others. My Mum came to see me and so did some other parents and I loved talking about our project and explaining our model to lots of people.

Our school won the Peer Award because Modbury Group 2 got the most tickets for their presentation. You can see the special award in the office trophy cabinet, it is pink and purple. Congratulations to Nailsworth Primary School who won the Industry Prize.

After the awards were given out we had lunch together. We got sandwiches, a drink and a cookie. After lunch, we packed up and then walked back to school and we were all very happy. Mrs Slater took a photo of us all and also Group 2 that had won the award. It was a great day!

THANK YOU **RAA**, SFERAS AND MAKERS EMPIRE.
