

AHC21216 Certificate II in Rural Operations [Partial Completion]

Course Outline

This course introduces students to the foundational skills needed to work confidently with plants, gardens, and nursery environments. Through practical, hands-on learning, participants explore plant care, garden maintenance, and landscape support tasks that reflect real workplace expectations.

With access to South Metropolitan TAFE's onsite nursery and extensive horticulture training grounds, learners gain authentic experience in cultivating plants, maintaining healthy garden landscapes, and supporting day-to-day nursery operations. This immersive environment ensures students can grow their abilities through genuine, industry-aligned practice.
