MONDAY 03 MARCH #4

## BEHIND THE JOB: Clinical Research Associate

### What do they do?

Clinical Research Associates plan and oversee clinical research trials that test new medical treatments and procedures. They ensure studies are scientifically valid, ethically sound, and follow all regulatory guidelines. Their work helps bring new medicines and healthcare solutions to patients.

### What are their strengths?

- Ability to interpret medical data
- Excellent project management abilities
- Understanding of ethical and legal research guidelines

### How do they get started?

A university degree in medical science, pharmacology, or a related field can open doors to higher-level roles in research and clinical trial management.

### Next steps
