

- Creativity, Colour and Fun!

What a colourful and creative Term 3 we have had in Visual Arts!

This term, students enjoyed exploring lots of different **colours, textures and materials** through fun, hands-on art experiences. They painted, printed, glued, wrapped, tore, arranged and constructed while creating their own unique artworks.

Students explored **nature and texture** through colourful leaf rubbings and created beautiful **tissue-paper trees**. They had lots of fun turning everyday materials such as **cardboard, pasta, buttons, wool, pipe cleaners and recycled objects** into wonderful works of art. We loved seeing these simple materials transformed into flowers, pumpkins, turtles, boats, patterns and imaginative 3D creations!

Our **wool and string art** was another favourite. Students wrapped colourful wool around cardboard to make interesting lines, shapes and patterns while practising their fine-motor skills and making their own creative choices.

Book Week was a special highlight! Students helped celebrate this year's Book Week by creating colourful reading characters and handmade musical instruments. Their wonderful creations became part of our Book Week display, celebrating stories, music and creativity across the school.

We also discovered that **art can be made from almost anything!** Through our recycled-art activities, students gave everyday materials a new life and used their imagination to turn them into something special.

Well done to all our amazing young artists. We hope families enjoy seeing some of the wonderful creations from Term 3!
