

# FOUNDATION

## Literacy Update

We have had an exciting few weeks in Foundation classrooms! Students are engaging in a range of learning activities and up for a challenge! This is noticeable in Text Construction, where students have been writing a range of sentences and adding detail. In Content Knowledge students have been learning about South America!

## Numeracy Update

Students are describing the characteristics of shapes! They are identifying circles, triangles, squares and rectangles based on how many sides and vertices the shape has. Students will be making shape pizzas later in the week!

## Skill in Focus

Cued Articulation is a set of hand cues for teaching the individual sounds in a word. Students use these gestures to identify the position of their mouth when saying the sound and if the sound is voiced or voiceless.
