

If I were the Prime Minister.

Hello, I'm JJ Parsgaard, my home community is Horn Island in the Torres Strait.

Firstly, I'd like to express my gratitude for being given this opportunity.

My job as Prime Minister is to assist ALL Australians.

My job is to reduce hardship for all Australians.

At my disposal are all the resources of this beautiful and bountiful land and that includes, it's wonderful people.

We have at present, an out-of-control 'cost of living' issue. To be more accurate, it is a 'disaster' for every single Australian.

This is affecting millions upon millions of us.

I would commence construction of infrastructure for cheap energy generation.

This would include,.

- hydro-electric dams. Both for irrigation and power generation.
- Building more clean coal power stations.
- Building the first of many Nuclear power stations

We have the best, cleanest coal in the world. We also have an abundance of uranium. This means Minimum CO2 emissions with no damage to our economy or loss of jobs.

This country is blessed by God, with many resources. The land has been nurtured by our First Peoples for over 60,000 years. We should use what the land has for the betterment of every Australian.

We can have the lowest cost and the cleanest energy in the entire world.

With this cheap and plentiful energy jobs will be generated

Imagine the tax revenue. This would reduce our debt.

I'd call this a 'no brainer', a win win from all sides.

The cost of living would greatly decrease.

Happy Australians.

This will fix Australia, and it's what I'd do if I were the Prime Minister.
