

Water for life

Water is important for life. Plants need water to grow, humans need water to drink. Fish need to live in water.

Plants

Water is essential for plants to be healthy, grow and live. Trees need water to grow. If seeds are too wet or too dry they will not survive.

Fish

Fish need water to survive because they live in water. If fish are not in water then they will die.

Humans

Humans need water to drink and survive. Water helps humans have energy. They also use water to shower and get clean.

Animals

Animals need water to survive and live. Water is important for an animal's health.

Tigers need water to swim and cool off.

Camels need water because they live in the desert where it is hot and dry.
