PREPARING FOR EXAMS

1. Find out what you need to learn: ask your teacher if you will be tested on the whole year's work or just the second half of the year.
2. Make your study notes: you want to get your study notes finished as quickly as possible.
3. Learn your study notes: studying isn't just about reading—it's about remembering.
4. Practise the skills of the subject: do as many different questions, revision sheets, chapter reviews, sample essays or past examination papers as you can.
5. Review your test-taking techniques: this ensures you make the most of the time in the exam.
Don't let nerves trip you up!

And remember, don't leave your study until the last minute – get yourself organised well in advance.
