

# Little Speakers Program

By giving your children the tools to communicate well, with confidence and clarity, particularly as they deliver presentations during their school years means that your children will be in a much better position as they become adults when they have to present for interviews.

Here's a few reasons why the extracurricular activity, 'Little Speakers Program', run at lunch time might benefit your child. They will:

- Develop critical listening and thinking skills.
- Fine-tune verbal and non-verbal skills.
- Overcome the fear of public speaking and develop confidence and self-esteem, which promotes resilience.
- Build self-awareness and leadership skills.
- Speak with greater clarity and expression by communicating with confidence and purpose.
- Acquire practical performance skills, essential to every aspect of life.
- Learn structured public speaking skills.
- Learn effective interview techniques.
- Develop leadership skills.

The added benefits of the program are that children are also more likely to develop self-awareness, which during their learning encourages confidence. Confident children have improved self-esteem, and healthy self-esteem helps to promote good mental health. Learning how to speak publicly supports all of this.

Building Voices Public Speaking currently have places available in the Little Speakers Program for children in Prep to Grade 6 for Term 1.

The fee is \$14 per session per child.

If you'd like to enrol your child to become more confident communicators, please contact our office or Samantha Richards via email [samantha\\_richards@buildingvoices.com.au](mailto:samantha_richards@buildingvoices.com.au) or call [0409 110169](tel:0409110169). Alternatively, you can go to [www.buildingvoices.com.au](http://www.buildingvoices.com.au) to learn more under 'Junior Public Speaking Program'.
