

After school learning with LEGO® Bricks

We believe in engaging and playful experiences that educate and inspire

BrickBuilders is a program designed by professional LEGO brick builders and qualified teachers - wrapping love for 'the brick' with solid experiences that expand knowledge and world view.

With a focus on STEM and Social Sciences, every BrickBuilder lesson includes a MasterBuilder skill, tailored age-level learning, and take home content!

Across the term, our lesson streams include...

Brickneering
Structural and mechanical lessons based on engineering.

Bricks around the World
Exploring geographic regions and cultures.

RobotBricks
Digital/robotic lessons utilising a range of control interfaces from remote controls, tile coding, and MIT Scratch.

This Brick in History
Illustrating important dates and events close to lesson date.

BrickSystems
Explaining how things in society interact to make a whole.

Ecobricks
Understanding the natural world, and our human impact.

MasterBuilders
Dedicated lessons that master LEGO brick techniques and creativity. Involvement in our professional creations
