

Melbourne City Reflection

Over the past few weeks we have been doing robotics as well as handball and soccer with the Melbourne City Football Club. I have really enjoyed this experience as it has pushed my technical abilities to the limit and as for the sport it really gets me going and I get really competitive when I'm playing. My favourite part was probably the Robotics World Cup because it has parts of competitiveness and also some skill is required. I've had a really fun time doing this with Melbourne City. I'm also really happy that our team came 3rd in the Robotics World Cup.
