

# Rosie Psychology

## Kingston Office

Opening July 1st 2023

58 Channel Highway, Kingston

## About Rosie Psychology

We are an allied health private practice dedicated to assessment and training services across Tasmania.

## Kingston Service List

### **Cognitive/Educational Assessment**

An intellectual (IQ) and academic assessment. This assessment will assess strengths and areas for support within the educational setting, and diagnose intellectual and learning disorders where appropriate. Suitable for students aged 6+.

### **Autism Assessment**

Our comprehensive assessments will determine whether a diagnosis is supported and provide a range of key recommendations to support your child. Combine this with an IQ or developmental assessment for more targeted information. Suitable for children aged 2.5 to 16 years.

### **Developmental Assessment**

Using the Griffiths-3, this assessment looks at your child's development compared to others their age and can diagnose Global Developmental Delay where appropriate. Suitable for children aged 2.5 to 6.

### **Early Entry to Kindergarten Assessment**

An intellectual (IQ) assessment to support your application for early entry into kindergarten.

### **Nonverbal IQ Assessment**

This assessment provides a more valid measure of intellectual ability for students who are less proficient in English. Suitable for culturally and linguistically diverse, deaf or nonspeaking populations.
