

## **COVID Positive Pathways program**

COVID Positive Pathways (CPP) provides care and support at home for Victorians diagnosed with COVID-19. The program is for people who are most likely to need care and support at home from their local health service while they have COVID-19.

Support may include:

- regular symptom monitoring
- telehealth assessments
- access to antiviral medications where indicated
- expedited access to escalated care as required.

All Victorians, including students, are eligible for supports through CPP, with allocation based on their healthcare needs.

Parents, staff or students who test positive on a rapid antigen or PCR test can apply for support via an [online form](#) or the Coronavirus Hotline on 1800 675 398.

More information on the program is available at [coronavirus.vic.gov.au](https://coronavirus.vic.gov.au).

Thank you for everything you are doing to keep schools open and safe.
