

Melbourne City FC Reflection

Iris D

Before the Melbourne City staff came in term #2 I was confused. When they did come, we did no sports and spent the whole time building which was boring. I chose Cynthia and Logan for my group, so it was a smaller group. Not much instruction was given on building the robots, either making it really stressful for my group and I!

The next Wednesday we finished off our robot, which we named Better Bob. We also did soccer and European handball using a soccer ball. They tried to make it more inclusive by making everyone touching the ball before scoring but that was even more stressful for me.

About three weeks later we did the soccer world cup, which was even more stressful for me.

So, overall, find a better robot clinic. Some stuff was good, like some of the soccer world cup thing was fun cheering on other groups however some groups also cheated by adding modifications to their robot disadvantaging other groups and nothing was done.
