MONDAY 30 JUNE #21

BEHIND THE JOB: Robotics Engineer

What are their strengths?

- Problem-solving
- Knowledge of programming and control systems
- Ability to design and test robotic systems
- Creativity and innovation in technology development

What do they do?

Robotics Engineers design and build robots for applications in manufacturing, healthcare, and space exploration. They develop automated systems to perform complex tasks efficiently.

How do they get started?

Bachelor's degree in Robotics Engineering, Mechanical Engineering, Mechatronics Engineering, or Electrical Engineering is usually required.
