All of our webinars are free. Participants will receive a certificate after they attend.

We will share the latest tools and evidence-informed practices on how AI can be used by educators, families and students to explore new pathways for student success. Ethical considerations, real-world examples, and student voice will help explore the landscape of AI in Australian autism education.

## In this webinar we will:

- Learn how AI can be used to support autistic students in both simple and innovative ways

- Learn about ethical considerations and practices guiding AI use in schools and at home

- Become more confident in understanding this technology as it continues to develop.
