

PROJECT BY GURANSH RISHIT
MANMEET SHARISH AND MOAYID

SOLAR C.D

RACER

WHAT IT IS MADE OF

- 3 CD's
- Wires-2
- Solar panel
- And some plastic bits and pieces

HOW IT BEGAN

- So what we did first was take the plastic bits out of their places and started building in between came the cds And then came the(kind of) complicating part the wires it took us an hour to finish it and after the other CD part it still didn't work then we finished it after thirty minutes. Then we figured out that we placed the wires the other way around then we changed it around and it started to work but it was were slow.
