Term 3,

Week 8 & 9, 2021

Over the past fortnight the children were very busy at the program. We started the first week off by making wonderful 'Father's Day' gifts for our dad's and/or loved ones. Some of the gifts that were made included key rings, Father's Day cards, coupons, "all about dad" work sheets and many more lovely gifts. When making gifts for others the children really take their time and put in the extra effort to make everything look fantastic!

Our second week was inspired by one of our children, as he wanted to go around the school and pick up rubbish, so the theme for the week was all about the Environment. The children participated in craft by using recycled materials such as boxes, cardboard rolls, bottles and newspapers. They also did some planting, picked up any rubbish they found around the school and placed them in the correct bins, and created awareness about helping the environment through making posters. We hope this has helped promote a healthy lifestyle for the children and taught them to be respectful and responsible for the environment.

Reminder: With holiday program approaching please remember to make bookings. Unfortunately, these holidays we will only be operating for essential workers and vulnerable children only and will need parent permits before accepting any bookings.
