

SCIENCE DISCOVERY DOME

PREP, GRADE 1 AND 2A/B

The Science Discovery Dome is a mobile planetarium allowing students to have a 360 view of the night sky.

The movie that is presented is accurate to our geographical location and the date and time of the year.

The incursion is held in a giant inflatable dome that seats multiple grades in comfort.

Topics covered will include the differences between day and night, what causes day and night the phases of the moon for the Junior School, and what is in our Solar System for the Senior School.

Any questions please email Kathy Brehaut
kathryn.brehaut@education.vic.gov.au
