Dear Australia
Locked Bag, Australia 9999

Dear Australia,

It's all you see on the news, it's all around the globe. Coronavirus used to be small but now thousands have died, thousands have had it and thousands are in lockdown, including me.

My name is Mary, I live in Victoria. I love it here but the virus is bad here so we are homeschooling for the second time. My room is small so I don't enjoy learning as much as I do at school. I am not allowed to work outside my room because I like to sing and dance and make noise while I work. The first lockdown my parents could not stand my brother and mostly my sister complaining about me. So now I work in my small room and my small room only. I miss all my friends.

Do you know what annoys me so much? We went into lockdown for 6 weeks then we got to go back to school and just as I was getting back into the routine of school we had to go back into **lockdown!!!!!!!!!!**

I just want to be at school to see my friends plus it's my birthday in a week and I can't have a party and have grandparents over and I won't be able to see my best friend, it's going to be my first birthday without her.

I really hope this virus goes but it's not just going to disappear by itself.

So, stay home, stay safe and remember we're all in this together.

From Mary Jones.
