

The Preps have made a fabulous start to term 2, diving straight back into learning across the curriculum. We have conducted experiments and explored directional language with our Buddies, while also revisiting our classroom routines and the Wembley Values, with a particular focus on resilience this term.

MATHS

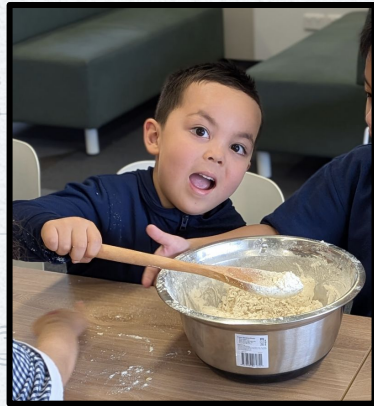

In Maths, we have learnt to partition; understand the parts of number. We have used all different materials to do so, even play money! We explored the different values Australian coins and notes hold.

SPECIAL EXPERIENCES

ANZAC Biscuits

Students prepared, baked and ate ANZAC biscuits, and created some outstanding poetry in response to this rich experience. It was a fun and delicious activity!

Exploring Plants

This term we're learning about Plants and Animals for our concept unit. Students have had lots of fun discovering new plants and how they look, feel and smell.

THE FARM!

The first excursion for our Prep students was one of the greats! From tractor riding to ponding we just about did it all. We are so proud of the amazing choices the Preps demonstrated throughout the day. Check out some of the fun we had!

UP NEXT IN PREP...

Our baby bunnies will be arriving on **Monday 25th May**. We will get to watch them grow over the next month! Keep an eye out for information around homing these bunnies, as the program allows the bunnies to be purchased by families after their time at school with us!

Prepare those dancing shoes, the annual Wembley Disco will be in **Week 9** of this term!
