

A new
campus for

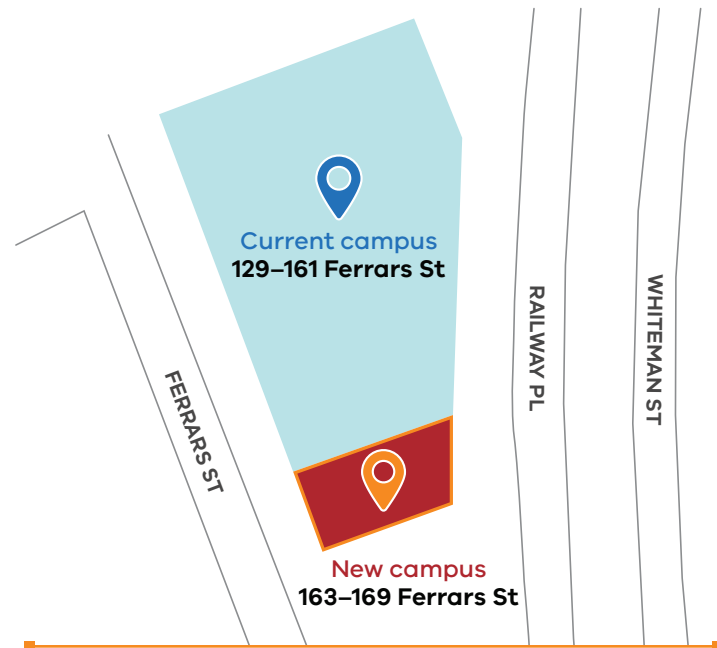

South Melbourne Primary School

The Victorian School Building Authority is building a **new campus** for South Melbourne Primary School. The new campus is expected to open in Term 1, 2029. It will help meet growing demand for local primary school places.

The project is now in the planning and design stage. Some early site works may occur in the coming months, including the removal of a tree on Ferrars Street.

We will share more information about construction once we have appointed a builder. We will work to minimise disruption to neighbours wherever possible during the project.
