

Hello parents, teachers and students,

This term the VCAL Intermediate class will be constructing a school community garden behind the A-wing. The VCAL class has been working on designing the garden and making special garden beds to go in the garden.

We need your help to make this garden look better. We would like to put in a pizza oven, get seeds to grow crops, pots to put around the garden, garden beds or materials to make a garden bed. We want to make a fish pond so any help towards that would be greatly appreciated. We are trying to get a pizza oven put in for the Italian classes and food tech classes and any help will also be greatly appreciated.

The VCAL Intermediate class have been working through term 1 to design the garden and raise money to help with costs. Any donations of any kind will be greatly appreciated.

Thank you, VCAL students.
