

# REMOTE LEARNING SURVEY RESULTS

## Surf Coast Secondary College

We would like to thank everyone who completed the Remote Learning Feedback Survey - both students and families. It is extremely important to us that we are catering to the needs of our young people as best we can. Looking at the responses below you will see that there are many different perspectives.

As a response to the survey, we have implemented some changes to the remote learning program which are highlighted in yellow in the Student Guide sent to families.

We would like to thank you all for your kind and respectful comments regarding Remote Learning and about our staff at Surf Coast SC. We understand that Remote Learning can be a stressful situation for families, particularly those working from home and assisting their children with their learning, just as it is for our teachers who also have school age children at home. It is wonderful to see the partnership between home and school operating so well. Thank you for your support.

---

**We received over 300 responses when asked for specific feedback.  
Below is a small selection of these comments.**

I do understand that your trying to put together a program to meet so many different learning needs & that is super complex, but for our son he was finished his work load by early most mornings (so hardly even 1hr of work) then some online classes which he found very unnecessary at times but other onlines were great.

The google meet timetable didn't appear to be up to date. Therefore I had to rely on emails from teachers which came in randomly throughout the day. Having 2 children to remind when their google meets are, plus work was hectic and I dropped the ball often.

It's a difficult task under difficult circumstances. Maybe the odd one on one zoom check in with students to check how they are going.

As a parent working from home the amount of work is good, the flexibility of being able to work at our own pace works well and having the different levels of MUST/COULD/SHOULD was great that last lock down.

Perhaps you could add a timetable or schedule of the day ahead to the parent as well. So we know where the kids are up to whilst we are working.

I feel that for the kids to engage more, it would be helpful for all kids to have their cameras on

# Summaries of our students' feedback about remote learning

In this 'wordle' the words that are the largest in size, are the ones that students were indicating the most frequently were feelings that were experiencing during remote learning

**Year Level of Students Responding**

**Whole School - Positive vs Negative endorsement - Teaching and Learning**

Overall, our students are more positive than negative about all aspects of remote learning except being required to be on devices a lot. Some great feedback was around how responsive teachers were.

**Whole School Responses - Positive vs Negative endorsement - Wellbeing**

Our students' wellbeing is of utmost concern. Clearly students enjoy being at school more than working remotely, as do our staff. There was a strong positive endorsement for students knowing who to reach out to when they need help.

**Thank you for your ongoing support and work**
