

Free Vocabulary Skill Builder

To improve vocabulary and spelling skills for students in Years 5 - 12

This is a useful website program and set of resources, called Wordly Wise 3000®. It provides an engaging and graded literacy intervention program that aims to help students learn new vocabulary which they will encounter in school tasks across the curriculum. As a sequential program, it is essentially a companion site for a series of workbooks which target vocabulary mastery, in graded components, from Year 2 (Click on 'Book 2') right through to Year 12 (Click on 'Book 12'). The program contains hundreds of words, definitions (including audio), and games which present and reinforce new vocabulary and correct spelling (allowing for a few unavoidable American spellings). This online program is being offered free of charge, but only until the end of 2017, so the LSE team suggests that interested parents and carers take a look at the program and encourage your boys to make use of this practical resource to boost their writing, speaking and reading skills this semester.
