

It has been a massive start to 2026 for the inaugural VPC class of Endeavour Hills SS! Students have been working through 4 different subject areas, building their confidence with using Google classroom and have also started their school based apprenticeships in Dandenong! With a focus on ready to learn scales and self awareness, students and staff worked together to build personalised scales to complement ready to learn plans. In literacy we have explored perspective and bias, learning us towards developing our debating skills. Our work related skills studies focused on preparing students to be successful in their apprenticeship, understanding applying workplace health and safety processes and procedures. Well done 4D on an incredible start to 2026!

Facts VS Opinions: Part 2

Learning Goal 7: Identify the main ideas and arguments in persuasive and influential content, noting the differences between fact and opinion
