

Beacon and CCLLEN Careers Videos Launch Monday 12 October 2020

56 video clips on a diverse range of careers

are now available to all secondary schools in Echuca, Moama, Kyabram, Rochester, Rushworth and Cohuna, to assist our young people to be informed and make positive choices about their career pathways.

Radiant Media Productions have captured the information from local businesses explaining what they do in their job, a typical day, and how they got into the industry. They also described some of the skills required for their role and which school subjects were important for their career.

The videos feature local businesses workplaces and staff carrying out tasks, creating realistic and meaningful views of different occupations.

The videos are hosted on your school portal and students can access during their career's classes. An interactive workbook has been created to assist students to gain the most from the videos.

We are very proud of the variety of careers that have been put together and we hope that this year's students and those to follow will find this tool useful in shaping their future.

A successful transition from education to employment sets a person up for life, and our local young people are our best resource for our future workforce.
