LITERACY & NUMERACY

In Content Knowledge students have begun their new unit 'The American Revolution'. Students have enjoyed learning about the beginnings of the American Revolution.

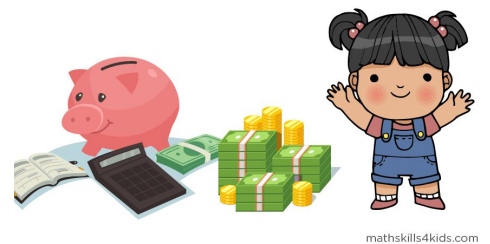

In Text Construction students have been revising the use of SPO's to create paragraphs. Students participated in a shared writing piece about the impact of humans on animals and their food chains.

In Numeracy students will be learning strategies for adding and subtracting with money. This week students will be participating in a grapple task to demonstrate their skills and knowledge.

SKILL IN FOCUS:

Parents can support their children in learning money maths at home by incorporating practical, everyday activities. Encouraging kids to count coins, calculate change, or compare prices while shopping helps them develop essential skills in handling money. By making these activities regular and engaging, parents can build their children's confidence and competence in money maths.
