6th September 2026

Dear Sir or Madam,

This is an expression of interest to any student that wishes to pursue a career in the cabinet making industry. If any of your students have shown interest in this career path, have the aptitude or have completed any workplace learning prior, could you please tell them, we are on the hunt for our next apprentice superstar! This is a rare opportunity and only 1x position comes up every few years. Our 2x current apprentices are due to be signed off as tradesman early next year!

Mr. Cabinets is different to other cabinet shops, We specialize in high end bespoke joinery to the commercial and residential sectors of the market. We are professional, friendly, inclusive and non-discriminating. We have staff in place to see that employees are taught new skills and thrive. Utilizing state of the art design software and plant equipment alongside traditional joinery methods. We use all types of materials, prefinished, veneers, solid timber, acoustic panels, acrylic panels ETC. With over 350 years combined experience, we have successfully trained numerous apprentices and once they become a tradesperson, majority of them wish to continue their employment with us. Every role is in house (no sub-contractors) so the successful applicant will be well equipped to specialize in specific areas if he/she decides to as they will obtain exposure to every role over the course of their apprenticeship. Drafting, Machining, Manufacturing, Installing, Project Management, Estimating and Leadership roles. Once completed this role also opens up future opportunities in the building and construction trades.

We are very passionate about what we do and would like to teach the trades of the future the correct way.

We are located locally at 113 Garling Street, O'Connor.

If any of your students or you have any queries please don't hesitate to contact me,

Regards,

Matthew Ryan
