

MOVEMBER®

**1 IN 6
MEN**

in Australia will be
diagnosed with
prostate cancer
in their lifetime.

EARLY DETECTION

98% CHANCE OF SURVIVAL
BEYOND 5 YEARS

LATE DETECTION

26% CHANCE OF SURVIVAL
BEYOND 5 YEARS

Early detection is key. To give yourself every chance against prostate cancer, talk to your doctor **AT 50, OR AT 45** if you're of African or Caribbean descent, or if you have a family history of the disease.
