

Ms. MOE HAMADA

D.O.B: June 26, 1998

Nationality: Japanese

Objectives:

I have been an elementary school teacher for 3 years and I really enjoy my job. As a teacher, I am very keen to broaden my experience in order to see things from more different points of view.

A year ago, I had an exchange student in my class from abroad. I spent two months with him. I was surprised at how different the way of thinking and the education system are between Japan and other countries. This raises my motivation to go and see overseas schools. I would like to experience life and education there and find out the good points that are different from those in Japan.

I also look forward to sharing many aspects of my own culture with children. Japan has a lot of beautiful and unique ideas and rich traditions. I hope to introduce some of them and help build friendship between Japan and Australia.

When I return to Japan after this program, I will be able to bring back many new ideas to help students or teachers become more interested in other cultures.

Character:

I am positive and easygoing. I am not afraid to fail and enjoy trying new things. I am also a helpful person, so I get on well with all kinds of person.

Skills, Abilities & Experiences:
