

Works notification

Major works in Parkdale and Mentone

The Victorian Government is removing 27 dangerous level crossings and building 17 new stations, making the Frankston Line level crossing free by 2029 and improving safety, reducing congestion and allowing more trains to run more often. We're removing the level crossings at Warrigal Road, Mentone and Parkers Road, Parkdale, and building a new Parkdale Station.

What we're doing

Works will take place during the following times:

- 🕒 6pm to 7am each night from Sunday 1 to Wednesday 4 October 2023
- ⚙️ 7am to 6pm each day from Wednesday 4 to Saturday 21 October 2023
- 🕒 12.30am, Sunday 22 October to 3am, Saturday 4 November (24-hour works)

We will be:

- moving the boom gates at Warrigal Road and Parkers Road to line up with the new temporary rail track and build a new pedestrian crossing near Warrigal Road
- transplanting trees near Parkdale Station on Como Parade West
- clearing vegetation along station platform on Como Parade West
- closing and demolishing the existing Parkdale Station
- joining the existing rail track to the temporary rail track
- decommissioning overhead cables and enabling the 22kV underground cables
- carrying out site excavation and earth works
- building temporary pedestrian crossings at Cremona Street, Warrigal Road and Parkers Road
- completing drainage and piling works in the rail corridor

What to expect

- Crews using site offices, compounds and laydown areas out of hours
- Moderate to high noise from construction machinery
- Vibration and noise during the demolition of Parkdale Station, sheet piling and track construction
- Changes to pedestrian crossings and road closures
- Traffic management near the work sites and additional workers, vehicles, and equipment

Managing construction impacts:

During construction, we actively monitor noise, dust, and vibration levels to ensure they are within Environment Protection Authority (EPA) control guidelines. To minimise community impacts we:

- use quieter reversing alarms on vehicles and machines, and noise blankets (when we can)
- use a range of measures to minimise dust to maintain air quality
- use targeted lighting to safely illuminate work areas, and reduce project lights shining into homes
- will keep in touch with directly affected residents
