What have you enjoyed about mathematics during remote learning?

I like adding up numbers. I also like using Mathletics on my computer. It is nice when mum or dad help explain what I have to do.

What has been hard about mathematics during remote learning?

Not seeing my friends to learn about mathematics together because sometimes they have good ideas.

What has been your favourite activity?

My favourite activity so far has been going on a shape hunt. There were cylinders, cubes, rectangular prisms and spheres everywhere!

What have you learnt lots about? Shapes

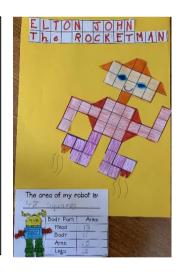

What are some of the differences about mathematics during remote learning and in the classroom?

It would be great if mum and dad had a whiteboard. But mainly I miss Mrs K. I don't get to see her.

Hugo Prep

This term in remote learning I liked having the Google Meets with my teachers. My favourite thing in maths was learning multiplication. I have found some of the multiplication hard, but I always figure them out in the end. I like sharing my maths with mum and dad. Making the Robot for the week on Area was cool! At home we don't do tests like we do in the classroom. I really like remote learning. The teachers are doing a great job!

Maths in remote learning has been quite fun but I particularly enjoyed doing maths with my study group some days at 10. The thing that I enjoyed the most would definitely be the maths Olympiad questions and google meets. I find the questions tricky and I love figuring them out with my friends. The google meet at 9:10 every Friday is a great way to learn things that I haven't even heard of before, for example ratios and using a union and intersecting in chance. Overall, I love doing maths for school (and out of school) because it is always so straight forward.

Mitch Year 5

I have really enjoyed learning about length, perimeter and area during Remote Learning. Some of my favourite activities were when we did the Veggie Garden Plan and the challenge of building the perimeter of a robot, that had Miss J's chosen perimeter. I also enjoyed making unique shapes with an area or perimeter that was given to us and measuring objects in our house. Some of the Optional Tasks have been creative and have made me think. It has been fun doing maths in Remote Learning!

My favourite thing to do in Maths while we have been doing remote learning was area and perimeter. We got to make little animals by drawing a shape and cutting it out. Then we added up the sides to get our animals' perimeter. Next we worked out the area of our animal. I loved it so much that I made extra ones too that were bigger. I also loved measuring different things around the house.

Grace Year 4

I miss seeing my classmates and teachers for maths since they will help me when I need it. But I have liked the fact that I am experiencing remote learning and maths at home since it helps me with my independent capabilities. My favourite part of maths is probably equivalent fractions, decimals and percentages. Some things I found a bit more challenging would be maybe a little bit of coordinates because it is very easy to mess up if you don't do it correctly. I only go on the math calls when I feel like I need a bit of guidance but most of the time I am pretty confident with my skills. :) My favourite part of maths remote learning would have to be the fact that it is all on a computer or some source of technology. I think this is because I like being very organized and most of the time, maths is always on one device. This means I'm not rushing around for anything besides a pencil and paper for working out equations and such. I miss my friends and my teachers and I hope I get to see them in person soon!

Lily Year 6

Maths has always been a frustrating and fun topic, but remote learning definitely challenged me. Without having those class discussions or just being able to quickly ask the friend beside you for help. At first, I always left maths to last but now I do it second or first because the tasks are set out clearly on the slide. I was definitely pushed out of my comfort zone when I first started Maths Olympiad but now it's so much fun and teaches a bunch of skills in 5 questions. I found fractions, decimals and maths easier to learn at school because it is one of those topics that is easier to complete at school.
