

# Centre of Applied Innovation

Dr. David Martin

Dr. Mark Troutman

School Holiday Seminar

7 July 2017

The Centre of Applied Innovation at Melbourne Polytechnic is hosting a delegation of U.S. Defence, Intelligence and Cyber Security experts 5-6 July, 2017. One of the faculty is Dr. Mark Troutman (Director, CIP/HS) who joined The Center for Infrastructure Protection & Homeland Security in October 2011 following his retirement as a Colonel from the United States Army after 28 years of service.

Dr Mark Troutman has kindly agreed to address an assembly of students from Victoria's secondary schools on the topic: ***Called to a Lifetime of Service as a Leader of Character***. Mark will describe his journey of service, first as a soldier who rose to senior rank as a combat arms leader, then as a senior officer serving in strategic policy leadership roles. He then followed this calling into a role as a leader in the academic community. Mark will challenge those in attendance to use their talents in the service of their community and nation, whether they are called into the private or public sectors.

The Centre's Director, Dr. David Martin, will then lead a **session on integral accounting**, the CAI's core operating principle and process. Integral accounting is an innovative way of thinking and problem solving that deepens your understanding of the world and the way you interact with it. This will be integrated with real world examples from the Global Innovation Commons. For more information on integral accounting, visit

<http://www.breathingenterprise.com/index.php/distribute>

If you would like to attend this event, we suggest contacting us to RSVP as soon as possible.

**This is a rare opportunity for Melbourne students to interact with two of the world's leading innovators and role models, Dr Mark Troutman and Dr. David Martin.**

Centre of Applied Innovation  
At Melbourne Polytechnic

The Centre of Applied Innovation is an independent finance, intelligence, and technology assessment organisation affiliated with Melbourne Polytechnic. The Centre is uniquely capable of bringing you the world's leading expertise without commercial bias.

Melbourne Polytechnic is Australia's first Polytechnic, charting a third way in tertiary education between traditional vocational education and academia. Melbourne Polytechnic's core mission begins by establishing industrial and educational relevance for partners and students.
