

Shepparton High School

BYOD Acceptable Use/Device Agreement

I understand that the following terms and conditions govern bringing a BYOD device to school.

1. Insurance and liability

Shepparton High School accepts no responsibility or liability for damage, loss, or repair of BYOD devices. It is strongly recommended that parents/caregivers insure their child's device for loss or damage.

2. Technical Support

The school will only support the connection of BYOD devices to the school's network and resources (i.e. internet, printing). All other technical support is the responsibility of the student and their parents/caregivers.

3. Device Identification

All BYOD devices should be clearly labelled with the student's full name, and we encourage engraving of devices where possible.

4. Device Charging

All devices must be brought to school every day fully-charged. No school chargers will be available for loan, and students are not permitted to use their own chargers to school.

5. Responsible Use

Any use of a device deemed inappropriate by the school may result in the withdrawal of BYOD privileges or other appropriate sanctions.

This Acceptable Use Agreement applies when I am using any personally owned digital technologies at school, at home, during school excursions, camps and extra-curricular activities.

I understand and agree to comply with the terms of acceptable use and expected standards of behaviour. I understand that there are actions and consequences established within the Shepparton High School Student Engagement Policy if I do not behave appropriately.
