

# Providing better facilities *for all.*

## REDEVELOPMENT OF MAZENOD'S FOOD TECHNOLOGY CENTRE

For the past 58 years, Mazenod families have generously contributed to improving College facilities, and you have continued that tradition. The College is extremely proud of the facilities and grounds that are provided and maintained for our school community, and we thank all who have made vital contributions to the continued growth of our College.

The Mazenod Foundation has launched a capital fundraising campaign for the existing Food Technology centre utilised by students from Years 8-10.

This facility, located in the Year 7 Complex, is outdated and no longer supports modern food technology / hospitality learning. With a substantial increase in size and function, the provision of a high-quality Food Technology learning space and associated facilities, including dedicated theory classroom, will support the curriculum and the great demand and enthusiasm for this much-loved educational program within the College.

*We acknowledge the original custodians of the land on which we learn, the Bunurong People of the Kulin Nation.  
Mazenod is committed to working in partnership to establish a future of reconciliation and shared story.*

## Your contribution *matters.*

The redevelopment of Food Technology sits within a broader and more substantial Mazenod Year 7 Complex redevelopment costing \$3.7m - fully funded by the College in the absence of Commonwealth and State Capital Grant support. This Year 7 project will include an additional 10th Year 7 classroom to meet increased community demand for a Mazenod education with improved indoor-outdoor connections, alterations to make learning spaces more adaptable to support a wider range of learning modes, and furniture changes and upgrades. This refresh will bring the key entry year level for new students and families to the College up to the contemporary high standards of the remainder of the learning spaces for Years 8-12 on campus.

The Foundation is seeking to raise critical tax-deductible funds to support the redevelopment of the Food Technology space. We are honoured that prominent Mazenod alumnus and restaurateur, George Calombaris (MOC1996), is lending his support for this project and will be our campaign Patron. The Foundation also acknowledges the support of Scott Giannuzzi (MOC1998) through his family business, Hospitality World Direct.

*"Upgrading the Food Technology area provides students with a more modern and safe learning environment, enhancing their efficiency, practical skills and engagement. With access to new facilities, students can experiment with a wider range of cooking techniques, gaining hands-on experience that boosts their confidence and culinary abilities. A well-equipped kitchen also encourages collaboration and problem-solving, essential skills for future careers in any field."*
