How to make bubble mixture

If you've run out of store-bought bubble mixture or need a quick entertainment idea for the kids, it's easy to make your own bubbles from washing-up liquid and water. But what's the perfect ratio, and what can you use if you don't have a bubble wand? We tried and tested different bubble mixtures and have come up with the best recipe for you to try with the kids at home.

Bubble mixture

Makes 350ml

Prep 5 minutes

- 50ml washing-up liquid (one part)
 - 300ml water (six parts)
1. Measure the washing-up liquid into a container.
 2. Slowly add in the water, being careful not to create too many bubbles at this stage. Gently stir the mixture together to combine – a chopstick is perfect for this.
 3. If you can, let the bubble mixture rest before using it, as it will make your bubbles even better.
 4. When you're ready, dip your bubble wand into the mixture and start blowing bubbles!

Homemade bubble wands

If you don't have a wand from a store-bought pot of bubbles, don't despair! You can have fun by looking for different items around the house that can be used to make bubbles. Here are some ideas to get you started:

- Paperclips – bend them into wands or use as they are
- Straws
- Biscuit cutters
- Pipe cleaners
- Fly swatters

Top tips

Letting it rest overnight, or as long as you can bear to wait, does allow the mixture to settle and combine, which will improve your bubbles.

Think big – if you want to scale up the recipe, you just need one part washing-up liquid to six parts water. Try making a big bubble mixture in a washing-up bowl – then you can use bigger items, like colanders and slotted spoons, to make bubbles in the garden.
