BE AT THE FOREFRONT OF MANAGING CHANGE!

Enrol in the **International Diploma Course in Resilient Health Care Management**. The purpose of this course is to teach how Resilient Health Care can be applied to the management of health care systems as support to Resilient Health Care in practical clinical work.

The course is provided by the **School of Health and Welfare at Jönköping University** in Sweden in collaboration with the **International Society for Quality in Healthcare (ISQua)** and supported by the **Australian Institute of Health Innovation at Macquarie University**, Sydney, Australia. The **lead faculty** are **Jeffrey Braithwaite, Erik Hollnagel, and Axel Ros**.

The course is blended multimodal learning with residential sessions, webinars and self-directed and reflective learning. The teaching is conducted through English.

Professionals in health care with managerial responsibilities, either corporate or clinical, are invited to enrol. This includes department and clinical team leads, risk managers, medical directors, quality managers, organizational developers, patient advocates, etc.

LEAD FACULTY

- **Erik Hollnagel** Senior Professor Patient Safety, Jönköping University / School of School of Health and Welfare and Visiting Professorial Fellow at Macquarie University
- **Axel Ros** Chief Medical Officer in Region Jönköping County, Sweden and lecturer at Jönköping University / School of School of Health and Welfare
- **Jeffrey Braithwaite** Professor of Health Systems Research, Australian Institute of Health Innovation, Macquarie University.

COURSE TOPICS (LIST NOT EXCLUSIVE)

- Evolution of theories of safety from linear to non-linear models and analyses
- Theories of Safety-I – Safety-II and Resilient health care
- Distinction between work as planned and work as done
- Introduction and application of systems thinking
- Developing and delivering organizational change
- Management of complex adaptive systems in different contexts
- Measuring and developing the potentials for resilient performance

PROGRAM DESIGN

The course will have 2 possible formats for students to choose between.

Option 1: Three Residentials

Module 1A: 24-25 October 2019 (2 days in Cape Town following the ISQua Conference - <https://www.isqua.org/events/ct2019.html>)

Module 1B: March 2020 (3 days in Dublin, Ireland)

Modules 2-5: March – September 2020 (distance learning with online web lectures and seminars, peer to peer learning and course work. All modules require the study of selected relevant literature)

Module 6: September 2020 (5 days in Jönköping, Sweden)

Option 2: Two Residentials

Module 1A&B: March 2020 (5 days in Dublin, Ireland)

Modules 2-5: March – September 2020 (distance learning with online web lectures and seminars, peer to peer learning and course work. All modules require the study of selected relevant literature)

Module 6: September 2020 (5 days in Jönköping, Sweden)

COURSE FEE

The course is run as **commissioned education**, meaning it is intended for employers who wish to send their employees for further education. As a commissioned education the application process is managed by Jönköping University.

The cost for the course is €10,900 Euro (including entry into ISQua's Fellowship Programme). Costs for literature, travel and hotels are not included. If starting in Cape Town, the ISQua Conference fee is not included.

If you are self-funding, the application will be managed by ISQua and an additional €100 Euro administration fee will apply.

Successful completion of the course will earn 30 ECTS credits. Students who successfully complete the course and the thesis can apply for a course certificate.

Students will also be registered on **ISQua's Fellowship Programme** at sign-up. Upon attainment of the ISQua Fellowship, Fellows have the option to continue learning by renewing their Fellowship annually.

Find out more about the Fellowship here - www.isqua.org/education/fellowship-programme.html
