Student Name: _____

Grade:_____ Date:_____

1. The newest Royal baby, named **Archie Harrison Mountbatten-Windsor,** is the son of Meghan and Harry. At birth he weighed 3 kilograms 260 grams. How many grams is that altogether?

2. "**HOUSE RULES**" is a program that begins at 7:30 pm and is meant to run for one hour. But one night it ran overtime by 22 minutes. At what time did it finish?

3. "**HOUSE RULES**" contestants must complete their renovations in just one week. How many hours are there in one week?

4. One couple in "**HOUSE RULES**" in 2018 improved the value of their renovated house a great deal. At the start their house was valued at $540,000. After renovation its value was $925,000. By how much did the value of that property improve?

5. One electrician is offering a $50 discount to people who mention his advertisement. If Chloe's mum got a light fitting repaired, and the electrician's normal charge was $130, how much did she actually have to pay?
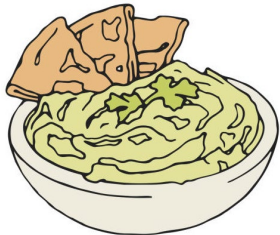

SPECIAL DISCOUNT

6. Australia's men's cricket team will experience a 66-day gap between home games this year, due to overseas commitments. How many **FULL** 7-day weeks are there in 66 days?

7. To feed a 3-month old puppy costs $1.80 per day. How much does that work out at per full 7-day week?

8. "**INTERNATIONAL HUMMUS DAY**" is held each year on May 13th. This year one restaurant is preparing a special, expensive hummus plate that costs $120. If 5 people share this delicious plate, how much would each person have to pay for their share?

9. How many months in the year have more than 30 days in them?

10. A square had a side length of 7½ centimetres. Find its **PERIMETER**.

11. Open-ended Question: A length of string is to be cut into pieces exactly 19 centimetres long, with no wastage. What could the length of that string be? (Give 3 possible answers.)
